

Description du produit

The safety light is ideal for traffic control, airports, petrochemicals and many other industries. The unit has a light sensor for automatic activation/deactivation, or can be set to full manual control.

The bright LEDs can be switched between a flashing or permanent setting, and the unit has an integrated rechargeable battery compartment which is powered by a standard DC adapter (not included). Simply twist off the Skipper or Skipper XS unit's top cap, and twist on the rechargeable safety light. Conforms to BS3143 part 2 1990. Uses 6X AA batteries (not included).
